

SIO 87-Volcanoes: an introduction

TH 4:00-5:50

York 3030

Instructor

Geoffrey Cook

Office: 366 Galbraith and 303 Vaughan Hall (SIO)

Phone: 534-3406

Email: gwcook@ucsd.edu

Office Hours: by appointment

Hello! I am thrilled to be introducing you to the exciting world of volcanoes! This seminar is designed to give students from a wide range of backgrounds a general understanding of volcanoes. You need not have a background in geology to enjoy the class. I always encourage questions and discussion in class and am happy to re-address or clarify concepts. I want this to be a positive and useful learning experience for each and every one of you!

Class Organization and Grading:

We will meet five times during the quarter, on Tuesdays in York 3030. The meeting days are: 10/7, 10/14, 10/21, 10/28, 11/4. In class we will engage in a variety of activities, including video presentations, analogue demonstrations, lectures, and discussions. You will be graded primarily on attendance and participation in discussions. Consequently, you need to be present at each meeting in order to pass the seminar. There are no exams, and no final exam. There will be one written exercise to be handed in at the last class.

Absences and Missed Work:

In the case of legitimate conflicts, absences will be accommodated provided there is written documentation. In the case of deaths, accidents, or sickness, notification is appreciated as soon as possible.

Classroom Conduct:

Disruptions during lecture will not be tolerated. Disruptive behavior including talking, excessive noise, poor behavior towards other students or instructors, arriving late/leaving early, reading newspapers in class, inappropriate language/comments in lecture, or ringing cell phones will result in your being asked to leave the class. Continued disruption will result in a referral to the appropriate administrative authorities. It is to your benefit to arrive on time because most announcements and assignments occur at the beginning of class.

SIO 87 Schedule

<u>Date</u>	<u>Activity</u>
10-7	Welcome and introduction to volcanology
10-14	Presentation: what are the different types of volcanoes and volcanic eruptions?
10-21	Film and discussion: "Born of Fire" (National Geographic)
10-28	Analogue volcano demonstrations
11-4	Film and discussion: Kilauea, mountain of fire (PBS); what do volcanologists do?
