

SYLLABUS for SIO178
Geophysical Fluid Dynamics
Winter 2018

Instructor:

Janet M. Becker

Office: NH 340 and EBU II 559.

E-mail: jmbecker@ucsd.edu

Office Hours:

Instructor office hours: TBA

Academic Prerequisites: Phys 2C, SIO 177 (waived for Winter 2018), Math 18 or Math 20F or Math 31AH or consent of instructor.

Prerequisites by Topic: elementary mechanics, differential and integral calculus, elementary ordinary differential equations.

Textbook:

B. Cushman-Roisin and J.M. Beckers (not me!), Introduction to Geophysical Fluid Dynamics, 2nd Edition, available through your UCSD account at:

<http://www.sciencedirect.com/science/bookseries/00746142/101>

The e-book is free through the UCSD library. If you prefer, you may purchase the e-book or a hard copy at the UCSD bookstore.

Piazza website: You are welcome to direct your questions (outside of lectures and office hours) to the Piazza website:

<https://piazza.com/ucsd/winter2018/sio178/home>

Ted website: Grades will be posted on: <http://ted.ucsd.edu>

Course description: Geophysical Fluid Dynamics (GFD) is the fluid dynamics that describes the large scale motions of the atmosphere and oceans. This course will explore how the Earth's rotation and

variations in density govern atmospheric and oceanic circulation. The class will develop a framework for understanding how winds drive ocean currents, why ocean currents are stronger on the western sides of ocean basins (e.g. think of the Gulf Stream), why hurricanes move westward, and how large-scale waves (called planetary waves) can influence sea level and climate.

Topics covered:

1. Introduction to GFD (Chapter 1)
2. Rotational effects: The Coriolis Force (Chapter 2)
3. Conservation laws: Mass, Momentum and Energy (Chapter 3)
4. Geostrophic Flows (Chapter 7)
5. The importance of friction: The Ekman Layer (Chapter 8)
6. Linear waves in a homogeneous ocean (Chapter 9)
7. Effects of Stratification (Chapter 11)
8. Stratified Geostrophic Dynamics (Chapter 15)
9. Large scale ocean circulation (Chapter 20)

Course grade:

The final course grade will be based on following:

Homework assignments (30%), mid-term exam (30%), and final exam (40%).

Homeworks: We will have weekly homework assignments.

Exams:

- 1st midterm exam: TBD
- Final exam: TBD

Course policy and Academic integrity:

1. Homework assignments and solutions are available on the Piazza website.
2. All students are expected to adhere to the UCSD Policy on Integrity of Scholarship. You may discuss homework problems, but must prepare and submit homework reports on your own.
3. Homework must be written clearly and neatly. The homework is due at the time specified on the assignment. No late homework will be accepted.
4. There will be no make-up exams (midterms or final).
5. Asking questions during the lectures is encouraged and appreciated.

Disability Resources: Students requesting accommodations for this course due to a disability must provide a current Authorization for Accommodation (AFA) letter issued by the Office for Students with Disabilities (OSD) which is located in University Center 202 behind Center Hall. Students should present their AFA letters to Faculty (please make arrangements to contact me privately) and to the OSD Liaison (Sandra de Sousa - EBU2-Rm.169) in the department at least two weeks prior to an exam to ensure that accommodations may be arranged.

Contact the OSD for further information:
