**Course description:**
Understanding human adaptation to climate change is increasingly relevant to modern life. As a discipline, archaeology provides tools to look at past instances of change and to study social resilience and vulnerabilities. This seminar studies the dynamics of climate change and human responses through time. Topics include research methods in socioecodynamics, human responses to change in different socio-political and economic contexts, and lessons from the past that can inform the present.

**Course objectives:**
By the end of this course, the student will be able to:

1) Distinguish climate and weather and explain why the difference is significant in social contexts
2) Identify proxies of past climates
3) Identify what aspects of climate change are relevant in the context of socio-natural dynamics.
4) Predict landscape-scale dynamism through time in contexts of relevance for human decision-making.
5) Give examples of social vulnerability (exposure, sensitivity, adaptive capacity) and scale-sensitive data in archaeological or ethnographic case studies
6) Apply the framework of scale-aware differential social vulnerability to a case study
7) Explain ancient social dynamics in the context of changing climate or extreme weather
8) Analyze the concepts of risk perception, hazards, resilience, vulnerability, exposure and adaptive capacity in the context of social dynamics with climate change.
9) Assess how climate change has been incorporated in the understanding of the social dynamics of a case study and formulate new research perspectives
10) Explain how knowledge of the past can contribute to an understanding of modern climate change threats.

**Required Textbook**

**Other important references:**

Expectations:
This seminar consists of open discussion with required background readings and in-class presentations. Formal lectures will also be dictated. The students will be expected to attend to class, do all assigned readings, and participate actively. Modified expectations will be adjusted for advanced undergraduate students enrolled in the seminar.

Assignments
Grading will be based on the student’s performance on the following assignments.

- **Not graded assignment**
  1. Attendance and participation (50 points)

- **Graded assignments**
  1. In-Class presentation (100 points)
  2. Mid-Term Essay (150 points)
  3. Final Essay (200 points)

Policies

**Total course grading**
The final grading for this course will be measured out of a total of 500 points, divided in the following manner:

<table>
<thead>
<tr>
<th>Assignment</th>
<th>Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>Attendance</td>
<td>50</td>
</tr>
<tr>
<td>Presentation</td>
<td>100</td>
</tr>
<tr>
<td>Mid-Term</td>
<td>150</td>
</tr>
<tr>
<td>Final Essay</td>
<td>200</td>
</tr>
<tr>
<td><strong>TOTAL POINTS</strong></td>
<td><strong>500</strong></td>
</tr>
</tbody>
</table>

**Grading scale (%)**
94-100 = A  
90-93 = A- 
87-89 = B+ 
84-86 = B  
80-83 = B- 
77-79 = C+  
74-76 = C  
70-73 = C- 
67-69 = D+ 
64-66 = D  
60-63 = D- 
<60 = F

**Late or missed deadlines (including exams)**
The standard policy for this course is zero tolerance for missed deadlines. Work submitted after the deadline will receive zero points. The professor reserves the right to accept late assignments in exceptional cases. If the student has a situation affecting his or her ability to comply with a deadline (including exam attendance), he or she must discuss it with the professor **before the deadline**. If the situation is an emergency, an explanatory email requesting additional time must be received in the professor’s inbox up to five minutes before the regular meeting time of the course or the assignment’s due time. **If these conditions are not met, requests for time extension will not be considered.** Exceptions will only be made on the most unique situations where the student was absolutely and unforeseeably unable to notify as described above, the situation was informed via email as soon as the student was able to do it, and further arrangements were discussed in person with the professor.
Academic Integrity

Students are expected to complete the course in compliance with the highest standards of academic integrity. Honest effort is expected of everyone. By continuing their enrolment in this course, the student pledges to abide by UC San Diego’s Integrity of Scholarship Agreement (https://academicintegrity.ucsd.edu/forms/form-scholarship-agreement.html) which reads as follows (some modifications were made to adjust it to the present course):

1. No student shall knowingly procure, provide, or accept any materials that contain questions or answers to any examination or assignment to be given at a subsequent time.
2. No student shall complete, in part or in total, any examination or assignment for another person.
3. No student shall knowingly allow any examination or assignment to be completed, in part or in total, for himself or herself by another person.
4. No student shall plagiarize or copy the work of another person and submit it as his or her own work.
5. No student shall employ aids excluded by the instructor in undertaking course work.
6. No student shall alter graded class assignments or examinations and then resubmit them for regrading.
7. No student shall submit substantially the same material in more than one course without prior authorization. A student acting in the capacity of an instructional assistant (IA), including but not limited to teaching assistants, readers, and tutors, has a special responsibility to safeguard the integrity of scholarship. In these roles the student functions as an apprentice instructor, under the tutelage of the responsible instructor. An IA shall equitably grade student work in the manner agreed upon with the course instructor. An IA shall not make any unauthorized material related to tests, exams, homeworks, etc. available to any student.
8. No student shall provide their assignments, in part or in total, to any other student in current or future classes of this course. No student shall procure or accept assignments from any other student from current or prior classes of this course.
9. For all group assignments, each member of the group is responsible for the academic integrity of the entire submission.
10. Each student is responsible for knowing and abiding by UCSD’s Policies on Integrity of Scholarship (http://academicintegrity.ucsd.edu/) and Student Conduct (https://students.ucsd.edu/sponsor/student-conduct/). Any student violating these policies will earn an ‘F’ in the course and will be reported to the University for the violation.

Attendance

Attendance is part of the final grade of the course. Points will be deducted for unexcused absences and late arrivals. Students arriving late to class have to inform the professor at the end of the class or they will be marked as absent. All absences must be justified in person before class, or up to 5 minutes before the meeting via email in case of emergencies. Notification of absence only guarantees consideration for excuse, and will not entail automatic exemption from class attendance. The professor reserves the right to excuse the student from attendance.

Accommodations for Students with Disabilities

If you have a disability for which you are or may be requesting accommodations, please inform the professor as soon as possible, and contact Office for Students with Disabilities (https://students.ucsd.edu/well-being/disability-services/). You must have documentation from the Office before accommodations can be granted.
Course outline:

I. **Introduction to Climate Change and Archaeology**
   a. Social vulnerability and human ecodynamics
   b. What is climate change and what does archaeology have to do with it?

II. **Concepts and methods**
   a. Resilience and adaptation: Geographic lottery and climatic opportunism
   b. Methods for studying society and climate change

III. **Human response and socioeconomic complexity**
   a. Hunter-gatherers
   b. Mixed economies
   c. Early complex societies
   d. Empires and colonialism

IV. **Archaeology and the present**
   a. Expected climate change and social vulnerability
   b. Contributions of Archaeology to research in the present

Presentations and Essays

The students will select research themes to explore in class. These research themes will shape both their mid-term and the final essays as well as the presentations in class. The topics will be selected on Week 3.

**Presentation (After Week 4):**

Format: 5 minute presentation (up to 6 powerpoint slides).

Explain: Topic, climate change context, social context (location and culture), and research idea.

The presentation and notes MUST be uploaded to receive full points (50 points will be deducted from Presentation Grade if this requirement is not complied).

**Mid-term Essay (Week 6)**

Format: Research proposal.

Include the following sub-headings: Introduction, Research Question, Theoretical Framework, Methods and case study, Hypothesis and expected outcome, Bibliography. More information will be provided.

**Final Essay (Deadline: Final Exam week – printed copy at the Department of Anthropology)**

Format: Final research, 12 – 15 pages in length (not including references). Additional information will be provided.

Preliminary Schedule

The final schedule and reading list will be posted in the class’ webpage. Without exceptions, the student will be held responsible for the assigned work as posted online even if it differs from the information detailed below. (Readings marked with * are required).
