For centuries, scientists and seamen have known that the atmosphere and ocean are closely related. Join Aitor Anduaga from the University of the Basque Country for a look at how the worlds of physical oceanography, meteorology, and hydrography have been intertwined over the past two centuries. Hear how scientists across several disciplines have developed tools and techniques to describe one of the most complex relationships on Earth.

APRIL 4, 2019

2:30pm Public Presentation | Reception to Follow
