

SCRIPPS INSTITUTION OF OCEANOGRAPHY AT UC SAN DIEGO

Protecting Our Planet for Future Generations

Groundbreaking discoveries at Scripps Institution of Oceanography inspire solutions to some of the greatest environmental challenges we face today.

“We are extremely grateful to our friends. With their ongoing support, I see many reasons for optimism today, and far into the future.”

– Tony Haymet, Director of Scripps Oceanography

Scripps Institution of Oceanography Second Century Fund

For more than a century, Scripps Institution of Oceanography at UC San Diego has played an important role in creating a healthier planet for future generations.

Our renowned scientists and students have made many important discoveries that have saved lives and billions of dollars. As an international leader in seeking

a deeper understanding of the globe, Scripps works on a daily basis to inspire solutions to some of the greatest environmental challenges facing society today.

Philanthropic support has played a vital role in helping Scripps achieve global excellence in scientific exploration, education, and discovery.

Scripps Institution of Oceanography Second Century Fund

Staying Ahead of the Curve

The world faces tremendous environmental challenges that require innovative and multidisciplinary solutions. In order for Scripps to continue its international scientific leadership, we established the Second Century Fund.

The Scripps Second Century Fund provides vital resources to ensure Scripps stays on top of the rapidly escalating environmental challenges of the 21st century.

With Your Support The Scripps Second Century Fund Will:

- Attract the best and brightest students from around the world to carry out critical scientific work at Scripps and beyond.
- Launch new collaborations among scientists working together on major environmental research initiatives and important discoveries for our planet's future.
- Advance the work of Scripps' world-class centers, including the Center for Marine Biodiversity and Conservation, the Center for Marine Biotechnology and Biomedicine, and the Center for Deep Ocean Research and Exploration, among others.
- Ensure the Scripps Oceanographic Collections maintain the global reputation as an irreplaceable record of life on Earth, and provide new opportunities for the holdings to be more widely shared around the globe.
- Expand Birch Aquarium at Scripps' offerings as the public interpretation center of Scripps Institution of Oceanography's world-renowned ocean, earth, and climate science.

“Private philanthropy
has transitioned from
‘icing on the cake’ to
absolutely vital.”

– Tony Haymet, Director of Scripps
Institution of Oceanography

Your Investment is Critical

Join us in protecting our planet for future generations by supporting the Scripps Second Century Fund.

Your contribution advances Scripps' education and research activities – critical work that inspires solutions to some of the greatest environmental challenges we face today.

Your investment makes a difference, today and for the next hundred years.
