Computational Ocean Acoustics and Signal Processing III

Winter 2025, 09:30-10:50am Tuesdays and Thursdays between 1/7 and 3/13 (total 20 lectures)

Classroom: Eckart 127

Instructor: Prof. Ying-Tsong (YT) Lin, ytlin@ucsd.edu ; office: Spiess Hall Room 460

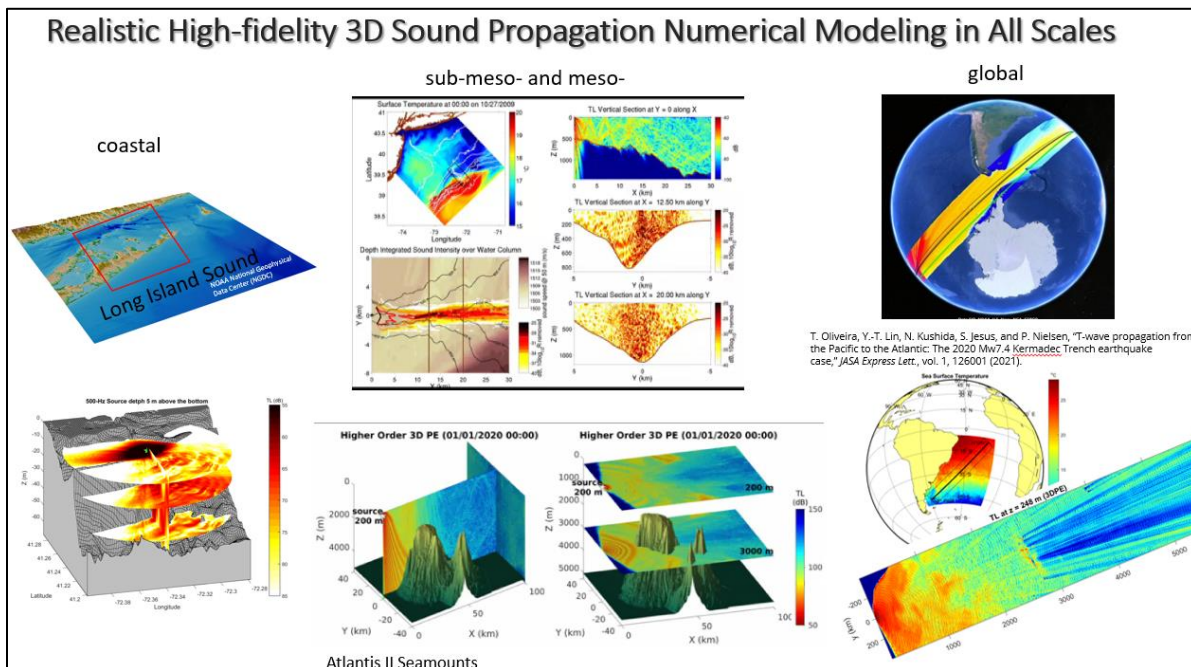

Office hours: Mondays 11:00am-2:00pm; Tuesdays: 11:00am-1:00pm; Thursdays 11:00am-1:00pm. Office hours (30 min a session; you reserve up to 2 consequent sessions on one day) can be either in person or remote, but by appointment only through the Google Calendar:

Lectures recordings are available on podcast.ucsd.edu.

Course Description

Acoustics is one of the most effective tools to explore the ocean from the surface to the depths. In this series of courses (Computational Ocean Acoustics and Signal Processing I-III), students will learn useful computational ocean acoustic models and signal processing techniques for processing and analyzing acoustic data to investigate ocean environmental variability, enhance underwater communication, and boost target detection and localization.

Course Learning Outcomes

Upon completion of this course, students will be able to:

1. understand the fundamentals of ocean acoustics
2. establish solid physical concepts of sound propagation and scattering
3. develop numerical models for underwater sound propagation and scattering
4. master essential signal processing techniques for analyzing acoustic data

Teaching and Learning Philosophy

Education is the foundation of a successful society.

To inspire students conceptualizing complex ideas

To encourage students thinking beyond mathematical formulas and equations

To enable students connecting and solving real world problems

Lecture Topics

**** Students are expected to develop their own computer programs on all subjects covered.**

I. 3D Sound Propagation Modeling

II. Perturbation and WKB Methods in Ocean Acoustics

III. Surface Noise and Scattering modeling

IV. Adaptive Array Processing

Technology Requirements

A computer and any scientific programming language.

Grading

Scale: A = 90-100 %, B = 80-89 %, C = 70-79 %, D = 60-69 %, F = 59 %-below

Weight: weekly homework 80%, final project 20%

Attendance and Participation

Every student is expected to attend all the classes. If missing a class, students should do their best to study the lecture recording and materials. Students are also encouraged to use the instructor's office hours for discussions.

Overall Course Expectations

What you can do to support your success in the course:	What I will do to support your success in the course:
stay current with the course progress	Be prepared and bring my enthusiasm to each lecture and office-hour session
Keep up with readings and homework assignments, as each one builds on the previous one.	Respond to emails within one working day, and provide timely feedback on assignments / submissions.
Contribute to the learning environment with fairness, cooperation, and professionalism	Establish a learning environment with fairness, cooperation and professionalism, and will take action if these principles are violated.
Treat your classmates, instructional assistants and myself honestly and ethically	Treat you honestly and ethically, and will address any concerns you might have
Commit to excel with integrity ¹ . Have the courage to act in ways that are honest, fair, responsible, respectful & trustworthy.	Uphold integrity standards and create an atmosphere that fosters active learning, creativity, critical thinking, and honest collaboration.
Manage your time, so you can stay on track with the course and complete tasks on time	Only assign work that is vital to the course, and will work to meet the standard credit hour allotment for the course.
Communicate with me if you determine that a deadline cannot be met due to extenuating circumstances	Consider requests for adjustments and will make reasonable exceptions available to all students when approved
